

Zscaler Completes SOC 2, Type II Certification

March 29, 2018

Achievement Demonstrates Continued Commitment To Security and Availability

SAN JOSE, Calif., March 29, 2018 (GLOBE NEWSWIRE) -- Zscaler, Inc. (NASDAQ:ZS), the leader in cloud security, today announced that it has received its Service Organization Control (SOC) 2, Type II Certification which provides independent validation that Zscaler™ security controls are in accordance with the American Institute of Certified Public Accountants' applicable Trust Services Principles and Criteria. The Certification further exemplifies Zscaler's commitment to the most rigorous security and availability procedures in the industry.

"Enterprises and government agencies have to hold their partners to rigorous security and availability standards so they can adopt cloud solutions with confidence," said Stephen Kovac, Zscaler vice president for global government and compliance. "Our certification with the SOC 2, Type II standard demonstrates Zscaler's commitment to ensuring that our global customers and partners are able to meet diverse compliance requirements."

To request a copy of the SOC 2, Type II Certification, please submit a request via the [contact form](#) on the Zscaler website. This certification was conducted by Coalfire, an independent cyber risk and IT advisory services firm.

About Zscaler

Zscaler (NASDAQ: ZS) enables the world's leading organizations to securely transform their networks and applications for a mobile and cloud-first world. Its flagship services, Zscaler Internet Access and Zscaler Private Access, create fast, secure connections between users and applications, regardless of device or location. Zscaler services are 100% cloud delivered and offer the simplicity, enhanced security, and improved user experience that traditional appliances or hybrid solutions are unable to match. Used in 185 countries, Zscaler operates a multi-tenant, distributed cloud security platform that protects thousands of customers from cyberattacks and data loss.
