

Zscaler Positioned as the Only Leader in the Gartner Magic Quadrant for Secure Web Gateways

December 14, 2020

Recognized with the Highest Completeness of Vision and Furthest in Ability to Execute

10th Consecutive Year as a Leader

SAN JOSE, Calif., Dec. 14, 2020 (GLOBE NEWSWIRE) -- [Zscaler, Inc.](#) (NASDAQ: ZS), the leader in cloud security, today announced Zscaler has been recognized as the only Leader in the Gartner December 2020 Magic Quadrant for Secure Web Gateways. Zscaler is positioned furthest in ability to execute and highest in completeness of vision among all 12 vendors evaluated in the report. This is the 10th consecutive year Zscaler has been named a Leader in the Gartner Magic Quadrant for Secure Web Gateways.

"Zscaler redefined networking and security for the cloud age, and we are proud to be recognized by Gartner as the only Leader in the Magic Quadrant," said Jay Chaudhry, Chairman and CEO, Zscaler. "Legacy technology is an inhibitor to digital transformation. Zscaler's multi-tenant, proxy-based architecture helps global organizations significantly reduce the attack surface with a true zero trust approach while eliminating encrypted attacks with complete SSL inspection."

To us, this recognition further cements the Zero Trust Exchange as the foundation for secure digital transformation. Zscaler's disruptive cloud-native architecture enables leading enterprises to break free from legacy approaches to networking and security with true any-to-any zero trust connectivity. Unlike disjointed, on-premises security products designed for yesterday's network, Zscaler's proxy-based architecture is built on an industry-leading SASE framework to deliver a great user experience, superior security and data protection with full SSL inspection, and eliminates the attack surface by directly connecting users to applications, never networks.
