Corporate IR Presentation

November 2023

Safe Harbor

FORWARD-LOOKING STATEMENTS

This presentation has been prepared by Zscaler, Inc. (“Zscaler”) for informational purposes only and not for any other purpose. Nothing contained in this presentation is, or should be construed as, a recommendation, promise or representation by the presenter or Zscaler or any officer, director, employee, agent or advisor of Zscaler. This presentation does not purport to be all-inclusive or to contain all of the information you may desire.

This presentation contains forward-looking statements. All statements other than statements of historical fact, including statements regarding our future financial and operating performance, including our financial outlook for the second quarter of fiscal 2024 and full year fiscal 2024, our planned products and upgrades, business strategy and plans and objectives of management for future operations of Zscaler are forward-looking statements. These statements involve known and a significant number of unknown risks, uncertainties, assumptions and other factors that could cause results to differ materially from statements made in this message, including any performance or achievements expressed or implied by the forward-looking statements. Moreover, we operate in a very competitive and rapidly changing environment, and new risks may emerge from time to time. It is not possible for us to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results or outcomes to differ materially from those contained in any forward-looking statements we may make, including but not limited to the ongoing effects of inflation, geopolitical events and the COVID-19 pandemic on our business, operations and financial results and the economy in general; our limited operating history; our ability to identify and effectively implement the necessary changes to address execution challenges; risks associated with managing our rapid growth, including fluctuations from period to period; our limited experience with new product and subscription and support introductions and the risks associated with new products and subscription and support offerings, including the discovery of software bugs; our ability to attract and retain new customers; the failure to timely develop and achieve market acceptance of new products and subscriptions as well as existing products and subscription and support; rapidly evolving technological developments in the market for network security products and subscription and support offerings and our ability to remain competitive; length of sales cycles; and general market, political, economic and business conditions. Additional risks and uncertainties that could affect our financial and operating results are included in our most recent filings with the Securities and Exchange Commission (“SEC”). You can locate these reports through our website at <http://ir.zscaler.com> or on the SEC website at www.sec.gov.

In some cases, you can identify forward-looking statements by terms such as “anticipate,” “believe,” “continues,” “contemplate,” “could,” “estimate,” “expect,” “explore,” “intend,” “likely,” “may,” “plan,” “potential,” “predict,” “project,” “should,” “target,” “will” or “would” or the negative of these terms or other similar words. Zscaler based these forward-looking statements largely on its current expectations and projections about future events that it believes may affect its business. Actual outcomes and results may differ materially from those contemplated by these forward-looking statements. All forward-looking statements in this message are based on information available to us as of the date hereof, and we do not assume any obligation to update the forward-looking statements provided to reflect events that occur or circumstances that exist after the date on which they were made.

Zscaler highlights

Founded in **2007** | Pioneer and leader in cloud security

Redefining network security, with the world's largest in-line security cloud and a 100% SaaS business model.

\$72B 

Serviceable market opportunity¹

Opportunity to secure hundreds of millions of users and workloads, plus billions of IoT/OT devices.

 Experienced, founder-led team

Conviction to build a lasting company with sustainable long-term growth.

Strong growth at scale

PERFORMING BEYOND RULE-OF-40

>\$2B
recurring revenue²

PROVEN HISTORY OF RAPID INNOVATIONS & GROWTH

4 stages of a breach in firewall/VPN architectures

CREATES RISK IN THE CLOUD AND MOBILE WORLD

Zscaler: Disrupting a 30-year-old paradigm in network security

TWO OPPOSING ARCHITECTURES

❌ Network & Firewall-centric Architecture

Secures a trusted network, connecting one-to-many and expanding the attack surface.

Rigid, Complex and a Security Risk
Barrier to Transformation

✅ Zero Trust Architecture

Uses, apps, and devices become islands in the cloud, securely connecting one-to-one through Zscaler.

Agile, Simple and Secure
Enables Transformation

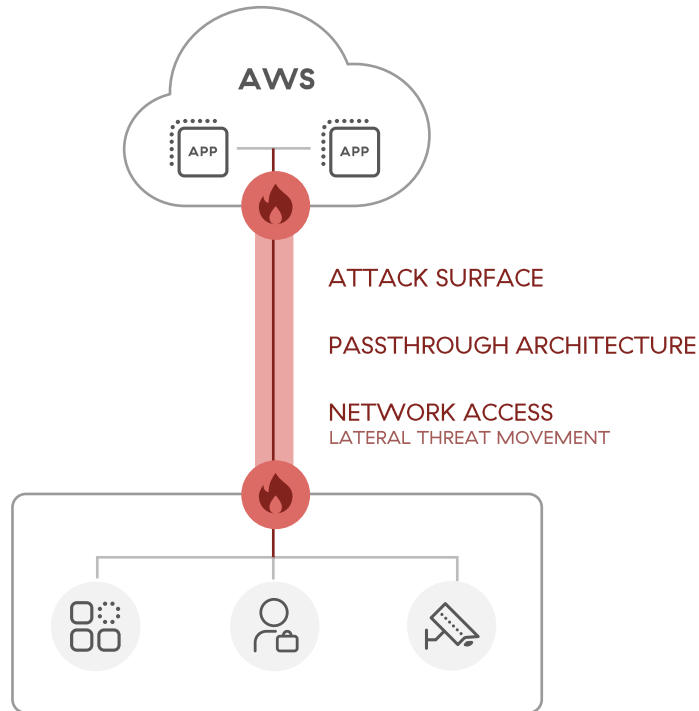

Zscaler: Disrupting a 30-year-old paradigm in network security

OUR ARCHITECTURAL DIFFERENTIATION GIVES US A LONG-TERM ADVANTAGE

Firewall / VPN

Firewalls are like bridges

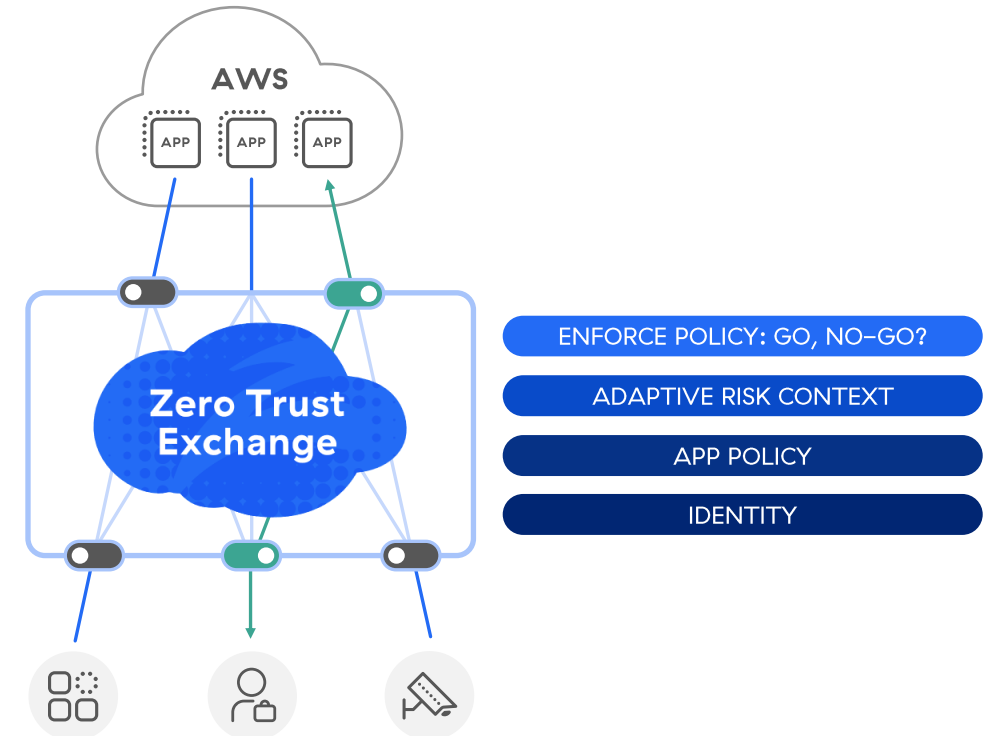

Connect users to a network, where everything is trusted, even attackers.

Zero Trust

Zscaler is like a switchboard

Securely connects one-to-one based on policies, not to the network, a core principle of Zero Trust.

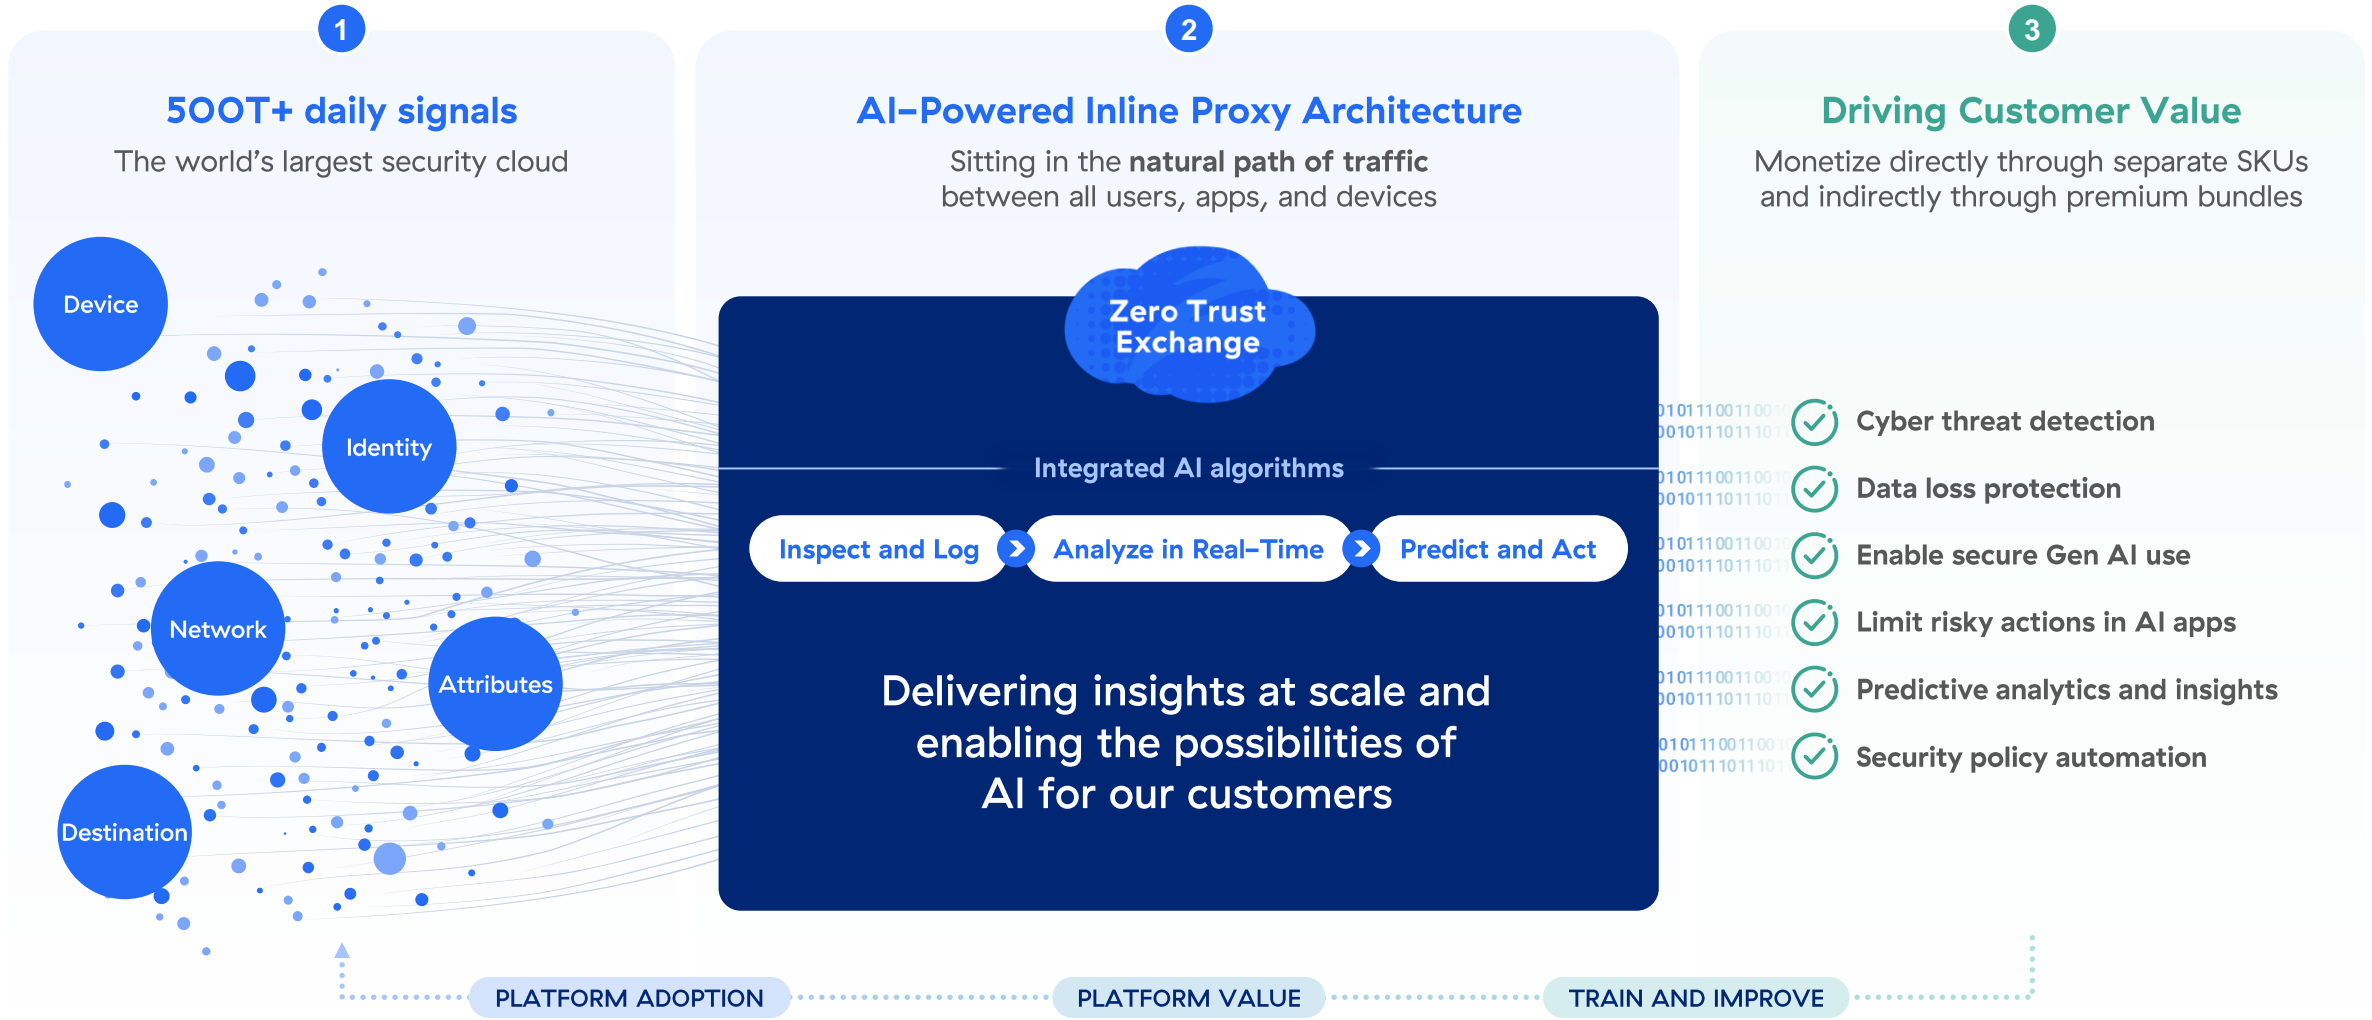

Zscaler Zero Trust Exchange™ platform

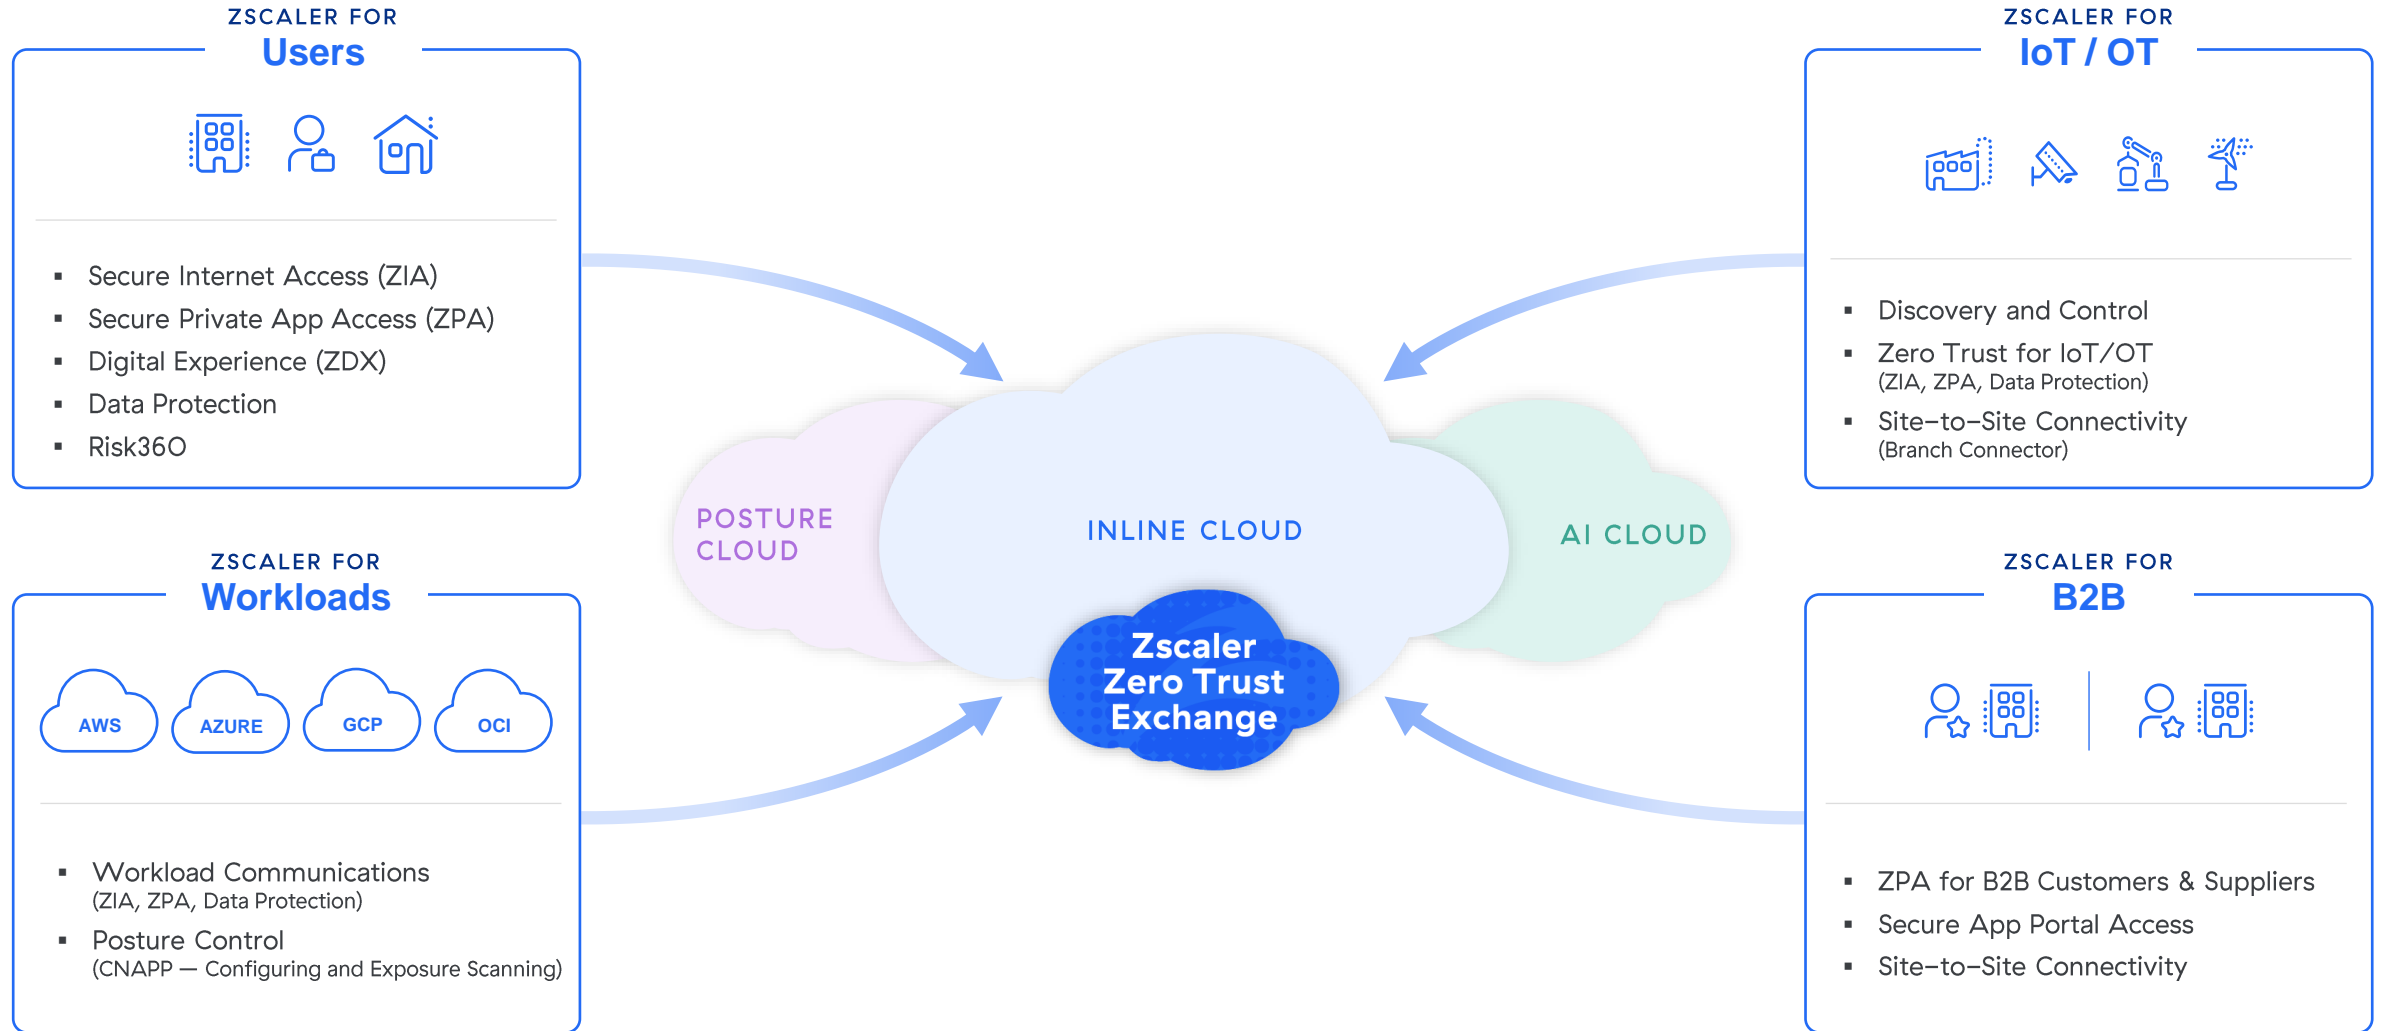

- ✓ One integrated platform to secure all traffic
- ✓ Built for scale
- ✓ Global at the edge
- ✓ Cloud from the start, not salvaging legacy tech
- ✓ Extensible innovation = Durable architecture
- ✓ Trillions of daily signals

Our platform architecture creates a unique AI opportunity

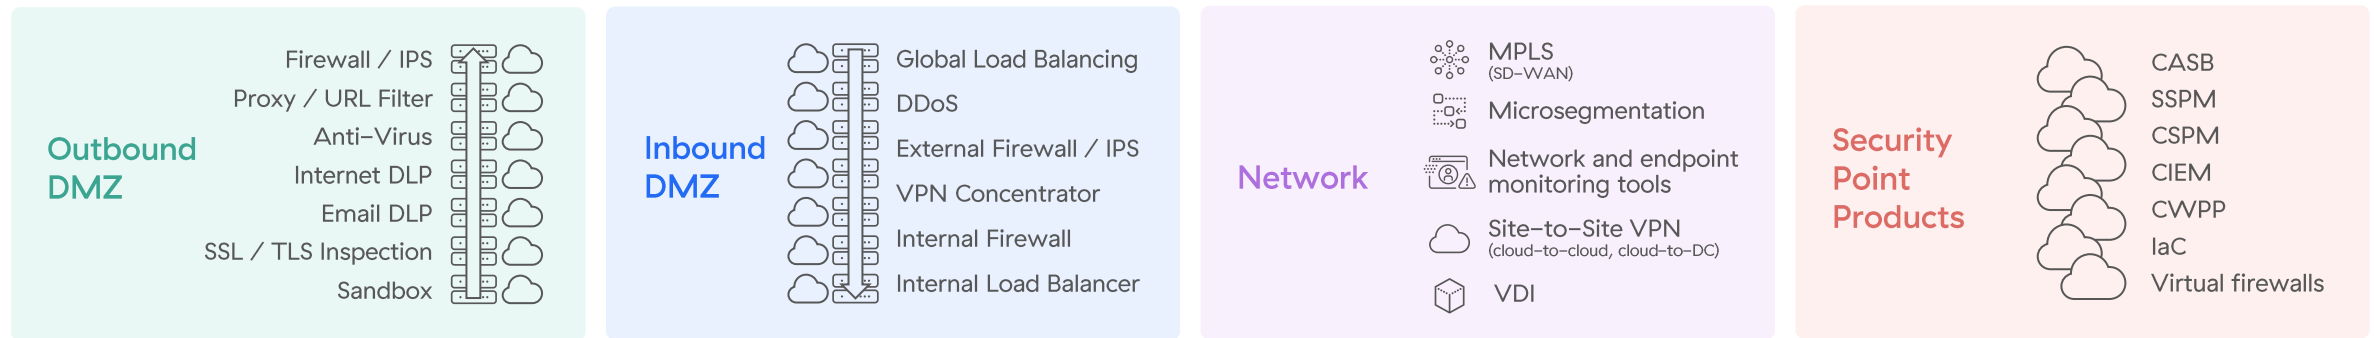

Zscaler platform offerings

Zscaler platform consolidates point products and simplifies IT

DESIGN ONCE, SOLVE FOR MANY

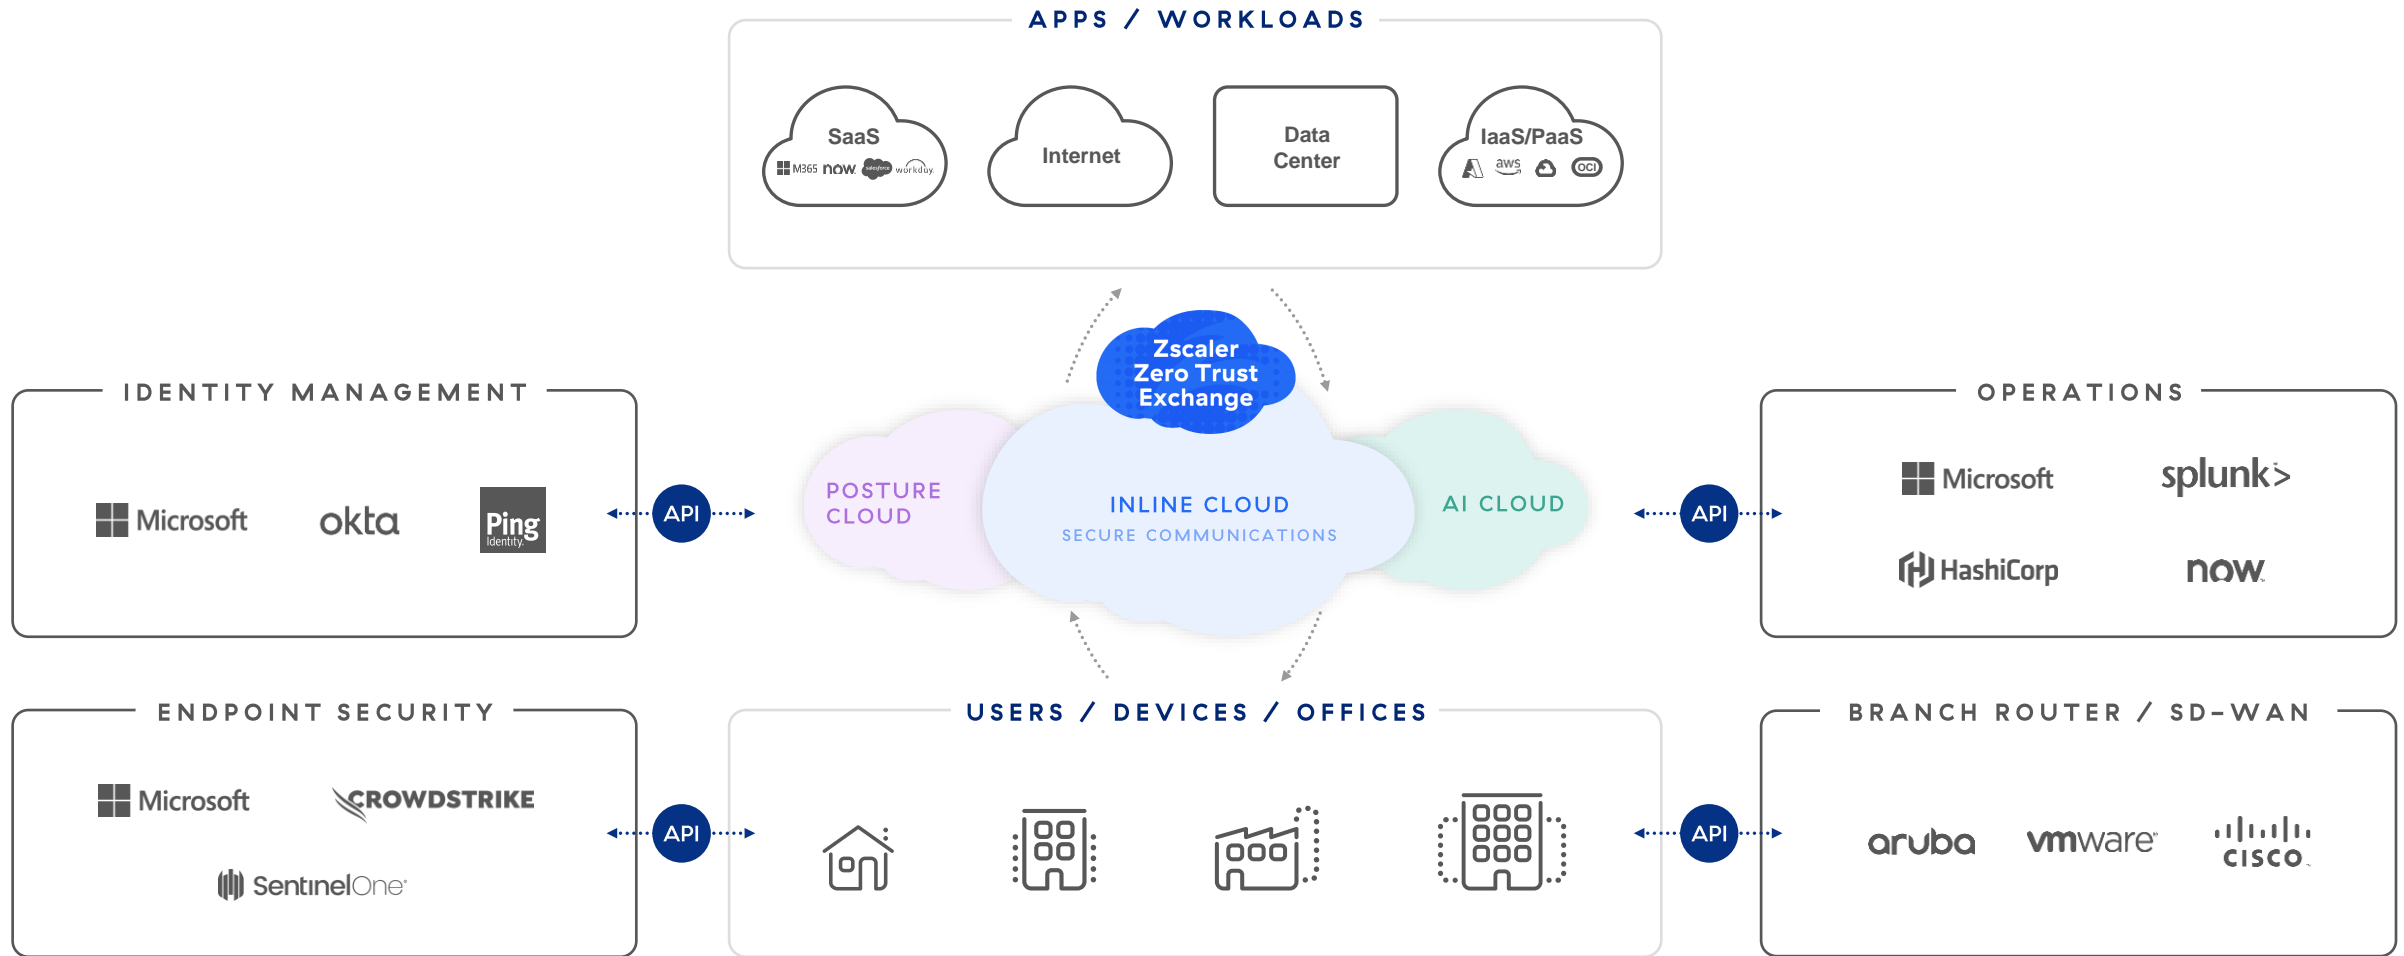

Zscaler Zero Trust Exchange

On vendor consolidation and operational savings alone, Zscaler typically provides customers:

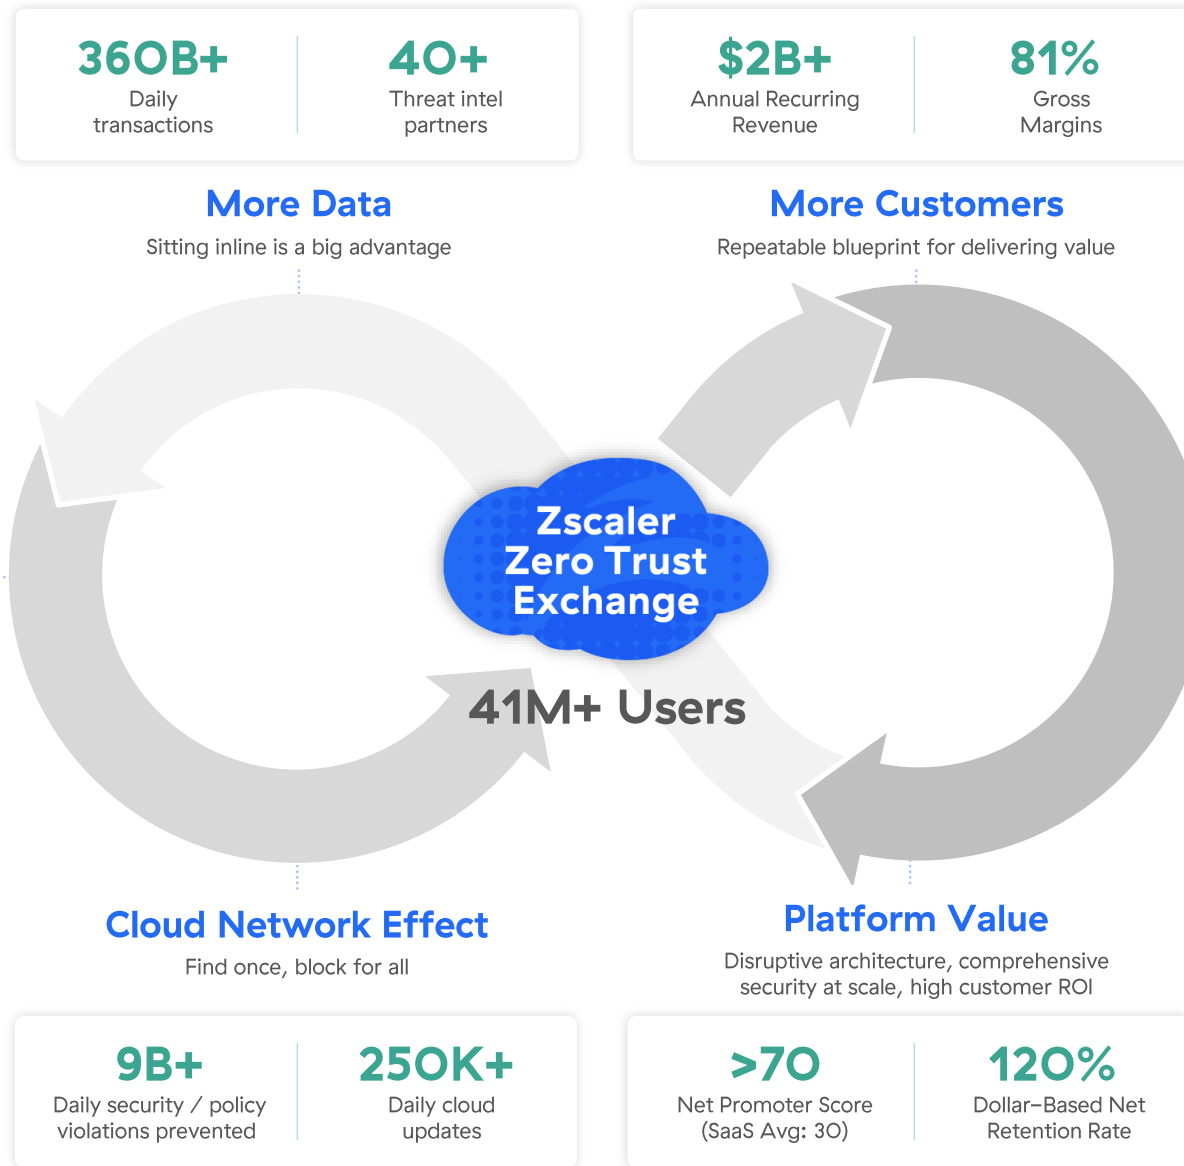

200%+
return on investment

<12 month
payback period

A critical integration partner positioned in the path of data

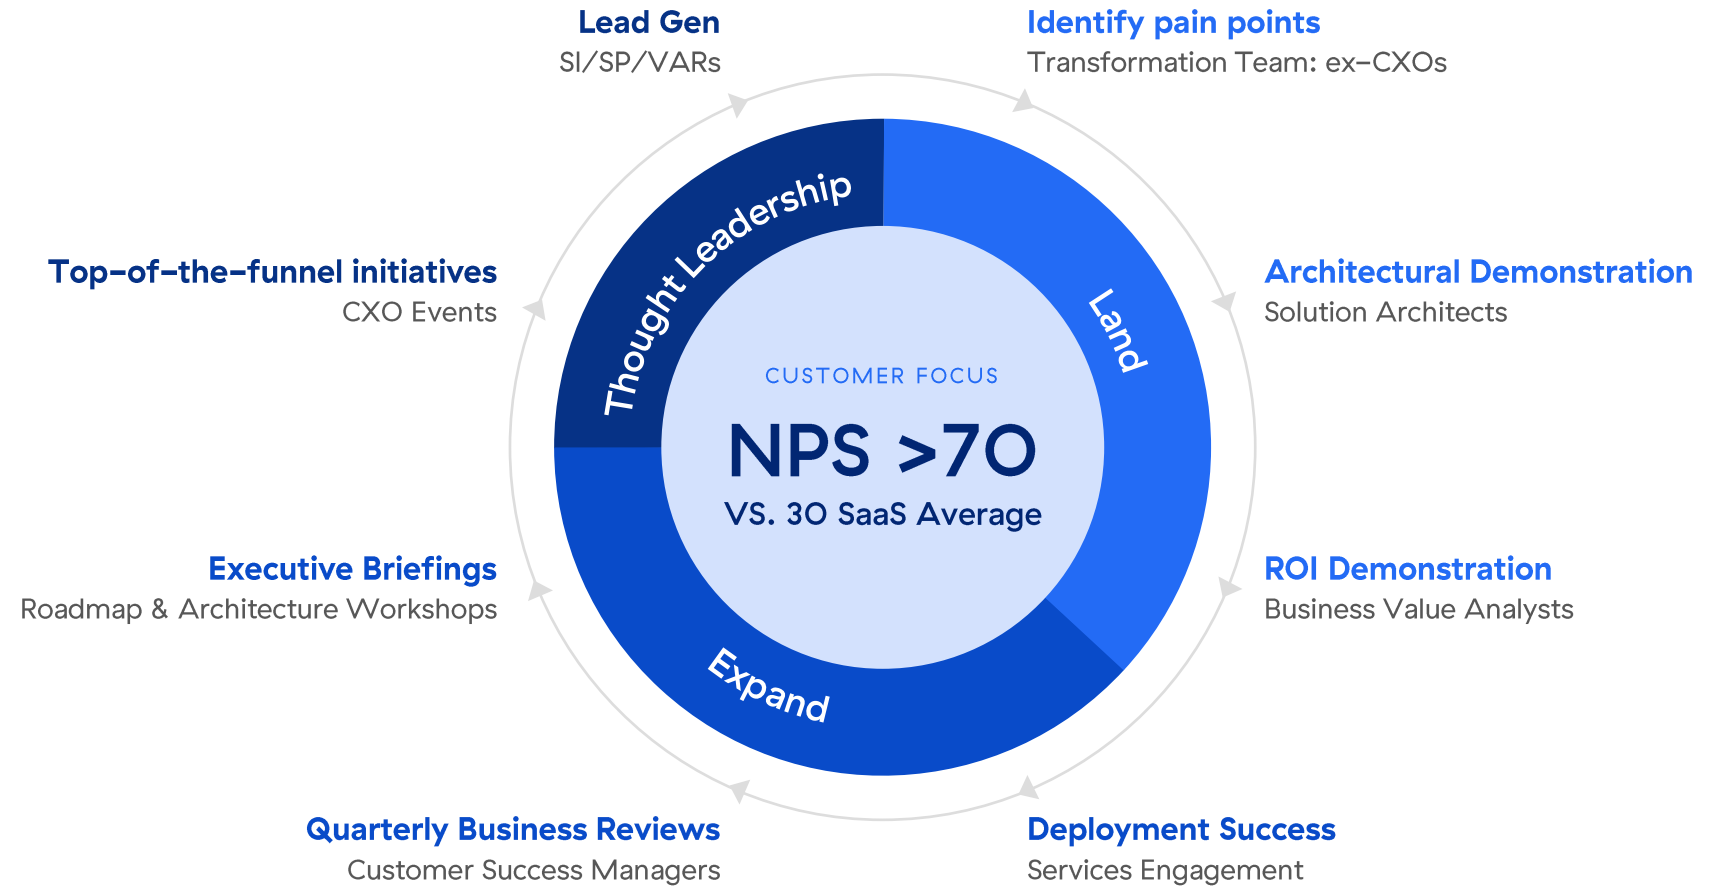

The network effects of a disruptive platform drives customer value at scale

Annual pricing model provides significant expansion opportunities

PRESENTED AT ZSCALER ANALYST DAY 2021 (JANUARY 11, 2021)

1. Per user pricing for individual products is effective annual prices to Zscaler for customers of 5,000 seats (also referred to as ARPU, or average revenue per user), except for new products including API CASB, Browser Isolation and ZDX, where we calculate ARPU based on closed deals with high volume purchases.

2. ZIA Professional Bundle includes Secure Web Gateway. Business Bundle includes all Professional Bundle functionality, plus SSL inspection, Advanced Threat Protection, inline Cloud Application Control, Bandwidth Control, and more. Transformation Bundle includes all Business Bundle functionality, plus Cloud Sandbox and Cloud Firewall.

3. ZIA Add-ons include Data Loss Prevention, Exact Data Match, API CASB and Browser Isolation.

4. Per workload pricing applies to Zscaler Cloud Protection (ZCP) products, including CSPM, Workload Segmentation and Workload Communication.

As ZCP products have been available for a short period of time, pricing per workload is effective annual prices to Zscaler in closed deals with high volume purchases, as well as Zscaler's estimate for current deals in progress.

Serviceable users of 335M and serviceable workloads of 150M

Users

>600M potential B2B users²
(3rd party vendors and customers of customers)

267M incremental users¹
(Commercial <2k employees)

335M serviceable users¹
(Current target market of ~20k organizations with 2k+ employees)

Workloads & OT/IOT devices

Billions of OT/IoT

338M incremental workloads³

150M serviceable workloads³
(Current target market of workloads at top public clouds)

1. Based on Zscaler's analysis of worldwide organization and employee data from ZoomInfo.

2. Zscaler's estimate of potential B2B Users is based on assuming a similar number of users as total worldwide workforce. We consider B2B users to include third-party vendors and customers of our customer.

3. Based on Zscaler's analysis of workload market forecast for 2020 from 650 Research.

\$72 billion serviceable market, plus bigger long-term opportunity

Workload SAM² for workloads in top public clouds

User SAM¹ focused on enterprises with 2k+ employees

1. User SAM is based on Zscaler's analysis of ZoomInfo worldwide workforce data for organizations with 2k+ employees, multiplied by Zscaler's aggregate average revenue per user (ARPU) of approximately \$45 for ZIA Transformation bundle, \$30 for ZIA add-ons, \$45 for ZPA and \$25 for ZDX from customers purchasing 5,000 seats.
 2. Workload SAM is based on Zscaler's analysis of 650 Research's workload market forecast for 2020, multiplied by Zscaler's aggregate average revenue per workload of approximately \$40 for CSPM, \$60 for Workload segmentation and \$55 for Workload Communication solutions in the ZCP family.
 3. Additional future opportunity available in securing the worldwide workforce of commercial businesses with <2k employees, users of B2B third-parties and customers of customers, Incremental workloads in hybrid/private cloud and other environments, and number of connected OT/IOT devices.

>6x

Upsell opportunity on ZIA and ZPA alone with existing customers*

*Upsell opportunity analysis based on Annual Recurring Revenue (ARR) of customers with 100 ZIA seats or more, as of Q1'21 ending October 31, 2020; this process eliminates paid trials and other smaller deployments, which if included would increase upsell potential further. Our analysis also excludes OEM agreements and end customers with deals primarily based on traffic/usage. Including all adjustments as noted, Adjusted ARR represents over 95% of Total ARR.

We calculate total Upsell Opportunity as total incremental ARR from selling additional seats to cover total employees and additional ZIA and ZPA product functionality at their existing subscription prices, and then applying an incremental discount of 35% on the upsell. Our analysis excludes newly introduced products, including ZB2B, API CASB, Browser Isolation, ZDX and ZCP.

We determine Incremental ARR by calculating the potential value of: 1) additional ZIA seat subscriptions for customers that have purchased ZIA for none or for a subset of total employees, assuming purchase of equivalent product functionality/bundles as existing ZIA subscription, or ZIA Transformation Bundle where no prior ZIA subscription was purchased, for remaining employees, 2) additional product functionality in high-end Transformation Bundle, where customers purchased Professional or Business Bundles, 3) add-on subscriptions for Data Protection products, including DLP and Exact Data Match, and 4) additional ZPA seat subscription for customers that have purchased ZPA for none or for a subset of total employees, assuming purchase of equivalent product functionality/bundles as existing ZPA subscription, or ZPA Business Suite where no prior ZPA subscription was purchased, for remaining employees.

Total employee count for existing customers is Zscaler internal data based on various sources including customer-supplied information, public filings with SEC, Hoover's, Dun & Bradstreet, Discover.org and ZoomInfo.

Significant international revenue

Historically, approximately 50% of our revenue has come from outside Americas

Early big wins in Europe

Continued investment after early success with G2000 customers including Siemens and Schneider Electric

Early investment in international sales

Replicated size of U.S. sales team internationally

Global SP partners

Focused on partnering with global service providers including BT, OBS, others to efficiently expand our reach

Revenue by geography

Based on Q1'24 revenue

Attractive cloud gross margins

Key factors

Purpose-built, multi-tenant architecture

Each subsystem optimized for high throughput, reducing the number of servers needed

Cloud operations

Highly automated, which requires lower head count to operate

Peering with content and service providers at internet exchanges

Reduces bandwidth cost

Non-GAAP gross margin¹

Note: Financials presented are non-GAAP; refer to the non-GAAP to GAAP reconciliation in Appendix.

1. Non-GAAP gross margin is defined as GAAP gross margin, excluding stock-based compensation expense and related payroll taxes and amortization expense of acquired intangible assets.

Investing for growth to capture large opportunity

NON-GAAP EXPENSES¹ AND NON-GAAP OPERATING MARGIN¹ AS % OF REVENUE

Key factors

Operating Margin	60%+ contribution margins on renewal cohorts in years 2 and 3
Cost of Revenue	Scale of our multi-tenant cloud benefits cost of revenue
Sales & Marketing	Investments for long-term leverage Building sales team to drive growth and penetration Ramping marketing efforts to build brand and create demand
R&D	Global centers in Silicon Valley & India Investing in R&D to enhance functionality
G&A	Significant presence in India

¹ Non-GAAP expenses exclude stock-based compensation expenses and related payroll taxes, amortization expense of acquired intangible assets, asset impairment related to facility exits, amortization of debt discount and issuance costs and certain litigation-related expenses. Refer to the GAAP to non-GAAP reconciliation in Appendix A.

Long-term model (Non-GAAP)

	FY19	FY20	FY21	FY22	FY23	FY24 Guidance	Long-Term Targets
Non-GAAP gross margin ⁽¹⁾	82%	80%	81%	81%	81%		78% – 82%
Non-GAAP operating margin	11%	9%	12%	10%	15%	17.3% ²	20% – 22%
Non-GAAP free cash flow margin	10%	6%	21%	21%	21%		22% – 25%

Non-GAAP operating margin

Non-GAAP free cash flow margin

1. Non-GAAP gross margin is defined as GAAP gross margin, excluding stock-based compensation expense and amortization of acquired intangible assets. Starting in FY21, payroll taxes related to stock-based compensation are excluded from non-GAAP. Refer to the GAAP to non-GAAP reconciliation in Appendix A. Prior periods amounts have been recasted to conform to this presentation.

2. Represents mid-point of FY24 guidance

Financial Appendix

Explanation of Non-GAAP Financial Measures

In addition to our results determined in accordance with generally accepted accounting principles in the United States of America (“GAAP”), we believe that the presentation of non-GAAP financial information provides important supplemental information to management and investors regarding financial and business trends relating to our financial condition and results of operations. However, non-GAAP financial information is presented for supplemental informational purposes only and should not be considered in isolation or as a substitute for financial information presented in accordance with GAAP. Investors are cautioned that there are a number of limitations associated with the use of non-GAAP financial measures and key metrics as analytical tools. Investors are encouraged to review these reconciliations, and not to rely on any single financial measure to evaluate our business.

Expenses Excluded from Non-GAAP Measures

Stock-based compensation expense is excluded primarily because it is a non-cash expense that management believes is not reflective of our ongoing operational performance. Employer payroll taxes related to stock-based compensation, which is a cash expense, are excluded because these are tied to the timing and size of the exercise or vesting of the underlying equity awards and the price of our common stock at the time of vesting or exercise, which may vary from period to period independent of the operating performance of our business. Amortization expense of intangible assets acquired in business acquisitions and related income tax effects, if applicable, are excluded because these are considered by management to be outside of our core business operating performance. Asset impairments related to facility exit costs are excluded because such charges are not reflective of our ongoing operational performance. Amortization of debt discount and issuance costs from our convertible senior notes are excluded because these are non-cash expenses and are not reflective of our ongoing operational performance. We also exclude certain litigation-related expenses consisting of professional fees and related costs incurred by us in defending against significant claims that we deem not to be in the ordinary course of our business and, if applicable, actual losses and accruals related to estimated losses in connection with these claims. There are many uncertainties and potential outcomes associated with any litigation, including the expense of litigation, timing of such expenses, court rulings, unforeseen developments, complications and delays, each of which may affect our results of operations from period to period, as well as the unknown magnitude of the potential loss relating to any lawsuit, all of which are inherently subject to change, difficult to predict and could adversely affect our results of operations. We estimate the tax effect of these items on our non-GAAP results and may adjust our GAAP provision for income taxes, if such effects have a material impact to our non-GAAP results.

Key Non-GAAP Financial Measures Included within this Presentation:

- Non-GAAP Gross Profit and Non-GAAP Gross Margin^(*)
- Non-GAAP Income (Loss) from Operations and Non-GAAP Operating Margin^(*)
- Non-GAAP Net Income (Loss) and Non-GAAP Net Income (Loss) per Share Attributable to Common Stockholders
- Free Cash Flow and Free Cash Flow Margin^(*)

*Non-GAAP to GAAP reconciliations shown on the following slides.

Appendix A: Non-GAAP to GAAP Reconciliation

Net cash provided by operating activities, as a percentage of revenue	19%	18%	30%	30%	29%
Less: Purchases of property, equipment and other assets, as a percentage of revenue	(8)%	(10)%	(7)%	(7)%	(6)%
Less: Capitalized internal-use software costs, as a percentage of revenue	(1)%	(2)%	(2)%	(2)%	(2)%
Free cash flow margin	10%	6%	21%	21%	21%

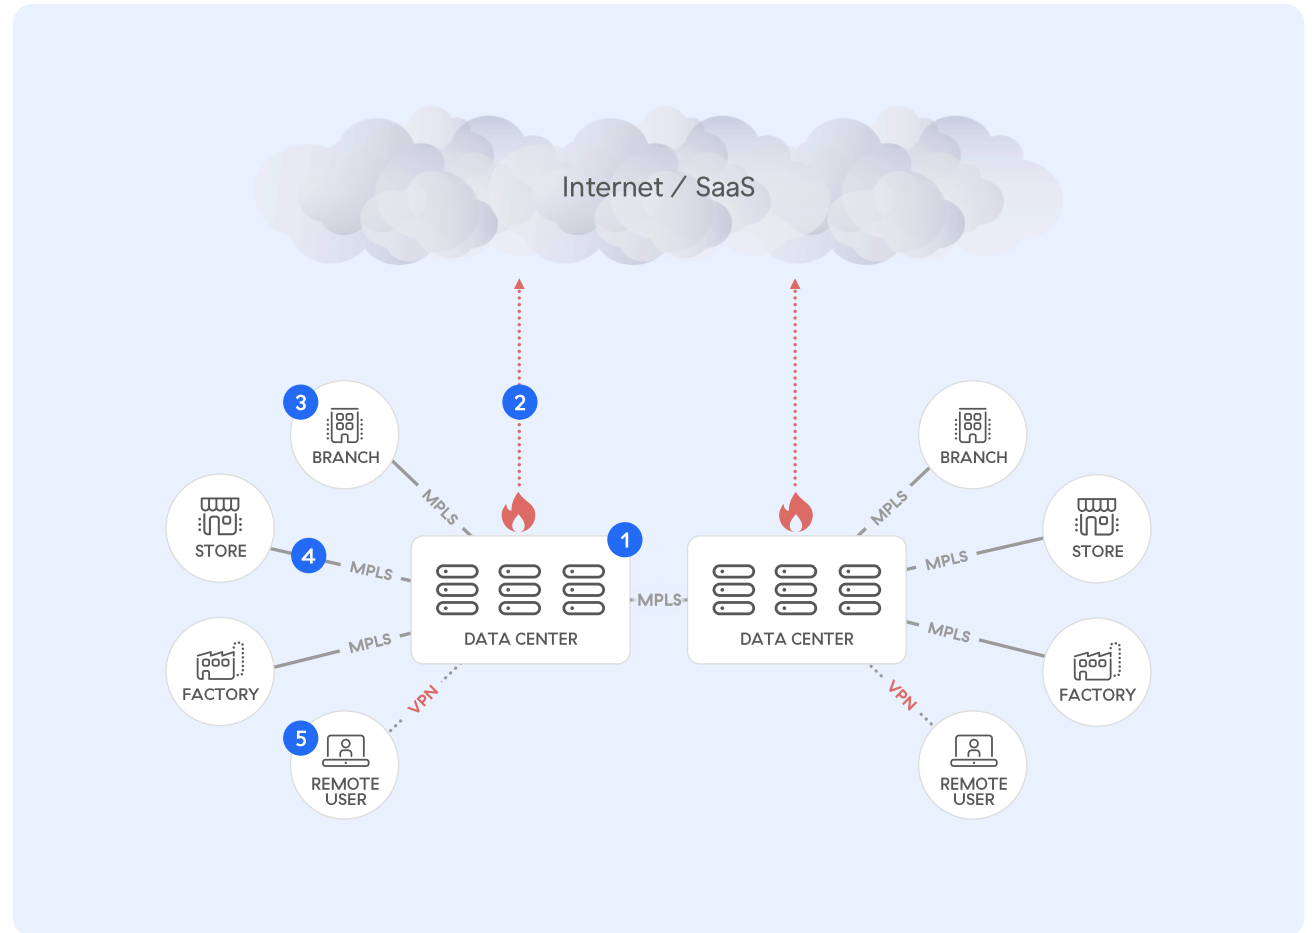

Appendix

Traditional IT: Hub & spoke networks

OPTIMIZED TO CONNECT USERS TO APPS IN THE DATA CENTER

The castle-and-moat/hub-and-spoke approach was based on the premise that all enterprise users, data and applications resided on the network.

- 1 A few data centers act as “hubs”
- 2 Data centers connect to the public internet via security stacks, as internet gateway
- 3 Branch locations (e.g., offices, stores, factories) connect to the hub, producing “spokes”
- 4 Private MPLS networks used to transmit traffic between hubs and spokes
- 5 Mobile/remote users expand the network via VPNs, adding new spokes

Traditional IT: Castle & moat security

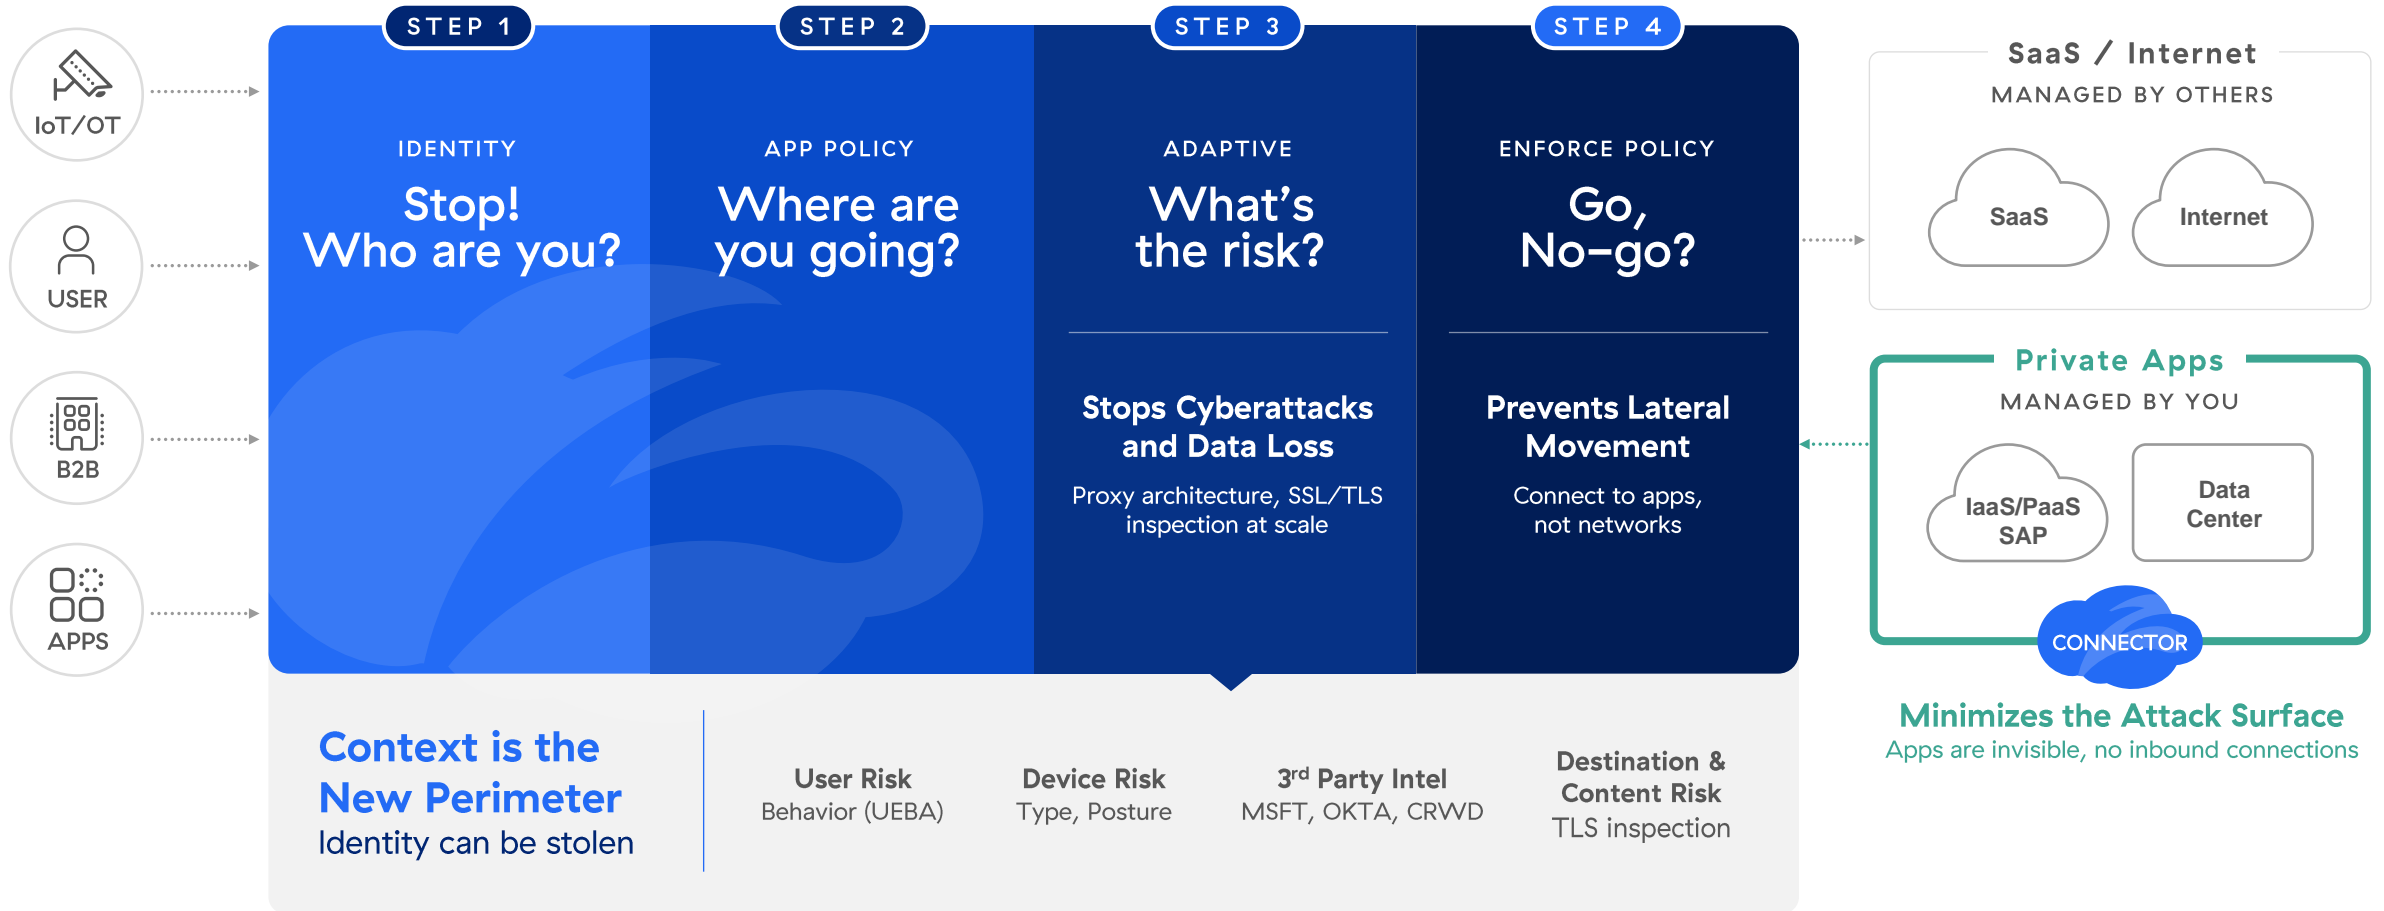

PERIMETER SECURITY APPLIANCES TO PROTECT THE NETWORK

Within the castle, everything is trusted; outside of the castle, everything is untrusted. If an attacker gains access to the network by crossing the “moat,” they can also access any data and systems within.

- 1 The network is set up with a perimeter of security appliances, like a moat around a castle
- 2 A stack of security appliances, called a gateway, or DMZ, acts as a “drawbridge” that allows specific traffic over the “moat” in and out of the network
- 3 Once inside, users can access all applications and data within the network, like people inside a castle having free rein of the castle grounds
- 4 Mobile/remote users cross through the DMZ via VPNs

Zscaler Zero Trust Exchange™ architecture

Reduce your carbon footprint with the Zscaler Zero Trust Exchange

SECURE YOUR DIGITAL TRANSFORMATION WHILE LOWERING YOUR ENVIRONMENTAL IMPACT

Zscaler is carbon neutral since 2022 and has set a goal to reach net zero by 2025

Environmental Benefit

Decrease IT waste

Security appliances, servers, and other on-premises hardware can be retired

Reduce energy consumption

Optimized cloud native architecture uses less energy than on-premises solutions

Run on 100% renewable energy

Zscaler is committed to efficiency and renewable energy for our security cloud

Potential Impact*

4,200

Kilograms
IT equipment retired

893

Megawatt hours
Annual energy savings

518

Metric tons of CO₂e
Annual carbon savings

*Case for organization with 25,000 users across 200 facilities

Efficient architecture with dramatically less environmental impact

Annual Carbon Footprint (MT CO₂e) – Organization with 25,000 Users across 200 facilities

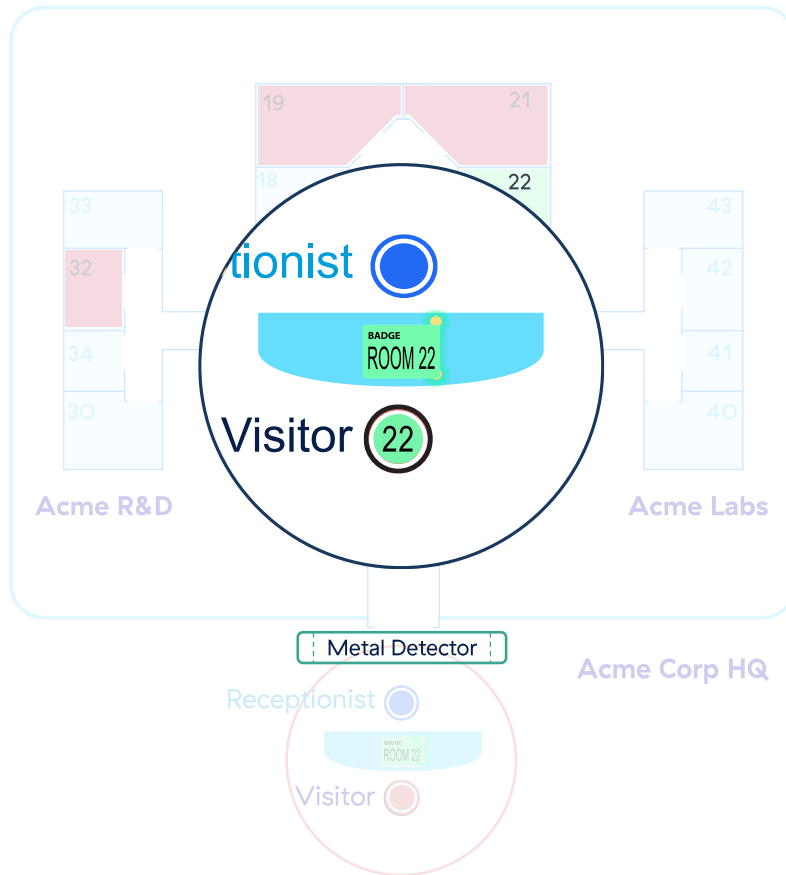

*Gross emissions before energy purchases applied

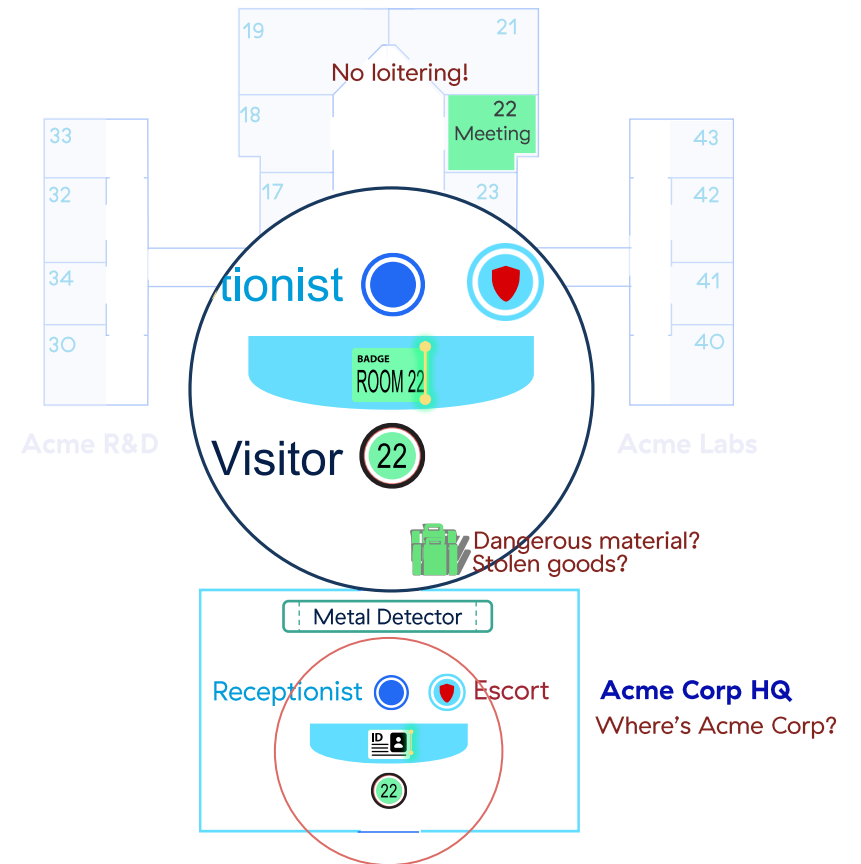

Legacy network security versus Zscaler Zero Trust Architecture

COMPARING CONNECTING USERS TO NETWORKS VERSUS USERS TO APPS WITH ZSCALER

Firewalls and VPN put users on your network.
That is like allowing unescorted visitors at HQ

Zero Trust access is like escorting a visitor to a meeting and then out. Plus hide your building (apps).

ZDX: Pinpoint the root cause of user experience challenges

END-TO-END NETWORK VISIBILITY BY HOP
